What is patents and copyrights?
 It would be relevant to mention here that a patent is an exclusive right granted by a country to an inventor, allowing the inventor to exclude others from making, using or selling his or her invention in that country during the life of the patent. A patent is issued to the individual inventor and not to a company.

ABOUT US

Entrepreneurs are often motivated by a desire to be recognized as a world-leader in a specific field. Their desire to share their knowledge and engage with their subject matter is often a source of frustration to privacy-obsessed VCs, but is a key internal motivation for the inventor.

ABOUT US

The patent system is an institution whose objective is to incentivize innovation activity (Scotchmer 2004; WIPO 2008)—that is, investments in research and development (R&D), the licensing of inventions, the commercialization of inventions, and the diffusion of technological knowledge via patent databases. Behind every invention there is an inventor or an inventor team. Micro-level decisions by firms and individuals to invest in R&D determine the macro-level rate and direction of innovation.

ABOUT US

Hence, strong IP laws give protection to IP and contribute to the economy of the respective state. IPR is one of the sources of security for intangible properties which are still open to the public and which can be quickly replicated by anyone.

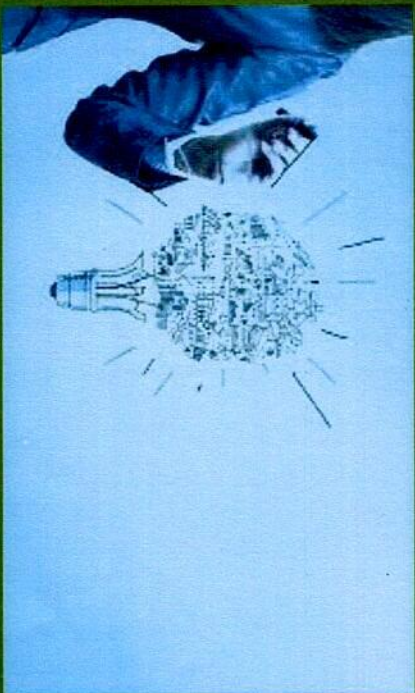

SEMINAR ON
INDIAN SCENARIO
OF IPR

21/09/2019

About us

Intellectual Property Rights awareness is vital to Generation of IPRs and then Commercialization of IPRs which is why IPR Awareness: Outreach and Promotion is the first and foremost objective of the National IPR Policy. There is a need to create IP awareness amongst all sections of societies as IP is creations of the mind. The Policy envisions a India where students in schools and colleges and universities, industry clusters and citizens across India in Tier 1, Tier 2 Tier 3 cities as well as rural areas are educated and made aware about their intellectual property Rights. In order to enforcement of IP rights of individuals/companies, it is important the the countries enforcement agencies and Judiciary are sensitized and up to date with the latest IP laws.

**1A seminar on
Importance of
Intellectual
Property Rights**

Strong IP rights help consumers make an educated choice about the safety, reliability, and effectiveness of their purchases. Enforced IP rights ensure products are authentic, and of the high-quality that consumers recognize and expect

ABOUT US

IPR provides a secure environment for investors, scientists, artists, designers, traders etc. to foster innovation and scientific temper. This innovation often has potential to yield astronomical returns and rewards to creators and users. Obviously, original inventors shall have rights to such profits

ROLE OF RESEARCH METHODOLOGY IN RESEARCH

A research methodology gives research legitimacy and provides scientifically sound findings. It also provides a detailed plan that helps to keep researchers on track, making the process smooth, effective and manageable.
