Signature of the Head of the Institute/ Department (With seal) \_\_\_\_\_

Photocopies of the registration form can also be used, if necessary, or the form can also be downloaded from the college website. Separate forms must be submitted in case of multiple faculty members intend to attend the program.

Faculty members of Engineering College

Instructors of ECE DEPARTMENTS and Professionals from Industries with

minimum qualification of B.Tech. and interested in should send their filled in registration form in

the prescribed format duly attested by the Head of the

institution/Department along with Demand Draft, to the address

Mentioned below, on or before 19 NOV 2017. For provisional

Registration, scanned copy of documents can be mailed to the

email id mentioned below.

Maximum number of participants allowed is thirty. Registration

will be confirmed only after receiving the Demand Draft. The

registration fee includes course material, lunch, tea and snacks.

Faculty of Engineering College Rs. 1000/-

Participants will have to send a demand draft, for the registration

fee, in favour of "KNRR Institute of Engineering", payable at

Institute on or before 18 NOV 2017

Last date for Registration :18 NOV 2017

Intimation of Selection 19 NOV 2017

ounded in 2008, Kasireddy Narayanreddy College of engineering & Research is one of states most distinguished colleges. It has a student strength of more than 3,000 and a large and vibrant team of faculty.

hope you will find your career preferences to twinset our academic interests, and several and leisure activities that will subsidize to your own. The Department of Communication and individual development. The strength of hand with intellects on our campus is a stretch of hand with intellects on the side and plain area on the other three sides. The students are provided with plenty of opportunities to develop their individual talents and abilities and to aspire for excellence in academics and personality development. We believe in engender and promulgate knowledge and talent in core and frontier disciplines through innovative education programs, research, industrial training and consultancy and developing a new cadre of proficient citizens with a high level of competence, profound sense of social commitment and moral ethics.

## About the Department of ECE

The Department of Electronics and Communication Engineering was established in 2008. It has experienced and qualified teaching and non etching staff. The department has MOU with many institutions thus bringing the between institute and industry through internships, training programs, guest lectures, industry based projects and other interaction programs.

To be a center of excellence providing quality education in ECE AND COMMUNICATION ENGINEERING

## The Department

- To create an active learning environment.
- To blend the faculty research under students project work.
- To promote inter disciplinary interaction and teamwork among the students.
- To update the students with recent trends in industry and research.

## About the Course

VLSI in Communications. THE explosive developments in very large scale, In- tegrated. (VLSI) circuits in recent years has become the pacing force in the development of new communication systems.

### At the end of the FDPs, delegates are able to

- Reduced size for circuits.
- Increased cost-effectiveness for devices.
- Improved performance in terms of the operation of circuits.
- Requires less power than discrete
- Higher device reliability
- Requires less space
- Memory chips denser
- Weight decreases.
- In the process of chips fabrication technology is used.
- In integrated circuits, transistors size decreases or reduces.
- Electronic devices display screens improved.
- Power consumption reduced.

### Food and Accommodation

Accommodation and T/A/A expenses are to be met by the Participants. Necessary food will be provided by the Institute. The delegates have to arrange their accommodation on their own.

### Food

Lunch, snacks and beverages will be served to the registered participants at free of cost.

## About the Institution

Founded in 2008, Kasireddy Narayanreddy College of Engineering & Research is one of states most distinguished colleges. It has a student strength of more than 3,000 and a large and vibrant team of faculty.

Hope you will find your career preferences to twinset your academic interests, and social and leisure activities that will subsidize to your overall welfare, gratification and individual development.

Our campus is a 70 acre stretch of land with hillocks on one side and plain area on the other three sides. The students are provided with plenty of opportunities to develop their individual talents and

abilities and to aspire for excellence in academic and personality development. We believe in engender and promulgate knowledge and talent in core and frontier disciplines through innovative education

programs, research, industrial training and consultancy and developing a new cadre of proficient citizens with a high level of competence, profound sense of social commitment and moral ethics.

### About the Department of ECE

The Department of Electronics and Communication Engineering was established in 2008. It has experienced and qualified teaching and non teaching staff. The department has MOU with many institutions thus bringing the between institute and industry through internships, training programs, guest lectures, industry based projects and other interaction programs.

The present student intake of the department is 120. The department has well experienced faculty. In addition to teaching and instruction, the faculty is also engaged in active research with an aim to generate innovative concepts and ideas or apply the existing technologies to new applications. The department has a number of ongoing/completed/applied research projects and industrial consultancy work from various agencies.

### Vision of the Department

To be a center of academic excellence providing quality education in Electronics and communication Engineering

### Mission of the Department

- To create an active learning environment.
- To blend the faculty research under students project work.
- To promote inter disciplinary interaction and teamwork among the students.
- To update the students with recent trends in industry and research.

### About the Course

Multisim™ software integrates industry-standard SPICE simulation with an interactive schematic environment to instantly visualize and analyze electronic circuit behavior. Its intuitive interface helps educators reinforce circuit theory and improve retention of theory throughout engineering curriculum.

At the end of the FDPs, delegates are able to

1. Ability to Reinforce Theory with Interactive Circuit Simulation
2. Exploration with Simulation-Driven Instruments
3. Data Visualization Data with 20 Powerful Analyses
4. Ability to Compare Simulated Data and Real Measurements from NI ELVIS inside Multisim
5. Simplification of the Teaching of Digital Circuits with the PLD Schematic
6. Ability to Easily Find the Components You Need
7. Powerful Teaching Options for Educators
8. Risk-Free Prototype in 3D Bread boarding Environment
9. Customization with NI LabVIEW
10. Professional Functionality for Advanced Designs
11. Related Resources

### Travel and Accommodation

Accommodation and TA/DA expenses are to be met by the Participants. No accommodation will be provided by the Institute. The participants have to arrange their accommodation at their own expense.

### Food

Lunch, snacks and tea will be served to the registered participants at free of cost.

- To update the students with recent trends in industry and research.

### **About the Course**

An embedded system can be an independent system or it can be a part of a large system. An embedded system is a microcontroller or microprocessor based system which is designed to perform a specific task. For example, a fire alarm is an embedded system; it will sense only smoke. It has hardware.

### At the end of the FDPs, delegates are able to

To use embedded systems. For example, they are highly customizable and low cost, which makes it easy and affordable to tailor them to exact functional and performance requirements. They also have low power consumption, which helps reduce energy costs for the overall system.

The purpose of embedded systems is to control a specific function within a device. They are usually designed to only perform this function repeatedly, but more developed embedded systems can control entire operating systems

The applications of embedded systems include home appliances, office automation, security, telecommunication, instrumentation, entertainment, aerospace, banking and finance, automobiles personal and in different embedded systems projects.

### **Travel and Accommodation**

Accommodation and TA/DA expenses are to be met by the Participants. No accommodation will be provided by the Institute. The participants have to arrange their accommodation at their own.

### **Food**

Lunch, snacks and tea will be served to the registered participants at free of cost.

## About the Institution

Founded in 2008, Kasireddy Narayanreddy College of Engineering & Research is one of states most distinguished colleges. It has a student strength of more than 3,000 and a large and vibrant team of faculty.

Hope you will find your career preferences to twinset your academic interests, and social and leisure activities that will subsidize to your overall welfare, gratification and individual development.

Our campus is a 70 acre stretch of land with hillocks on one side and plain area on the other three sides. The students are provided with plenty of opportunities to develop their individual talents and abilities and to aspire for excellence in academic and personality development. We believe in engender and promulgate knowledge and talent in core and frontier disciplines through innovative education programs, research, industrial training and consultancy and developing a new cadre of proficient citizens with a high level of competence, profound sense of social commitment and moral ethics.

## About the Department of ECE

The Department of Electronics and Communication Engineering was established in 2008. It has experienced and qualified teaching and non etching staff. The department has MOU with many institutions thus bringing the between institute and industry through internships, training programs, guest lectures, industry based projects and other interaction programs.

## Vision of the Department

To be a center of academic excellence providing quality education in ELECTRONICS AND COMMUNICATION Engineering

### **Mission of the Department**

- To create an active learning environment.
- To blend the faculty research under students project work.
- To promote inter disciplinary interaction and teamwork among the students.
- To update the students with recent trends in industry and research.

## About the Course

Objectives of the FDP are to train our Indian technocrats to solve issues address by National Educational Policy (NEP), creation of new knowledge, develop robust research echo-system in 'MEMS BASED SENSORS AND ACTUATORS FOR BIOMEDICAL APPLICATIONS' at our college.

This mainly involves softwares like ERP, Social media, Reference globe and many more...

At the end of the FDPs, delegates are eligible to

1. Bio-MEMS
2. Silicon and glass
3. Plastics and polymers Biological materials
4. ElectroKinetics
5. Microfluids
6. Ice Valves
7. Bio-MEMS in medical implants and surgery

- To blend the faculty research under students project work.
- To promote inter disciplinary interaction and teamwork among the students.
- To update the students with recent trends in industry and research.

**About the Course**

Nanotechnology is also enabling many novel devices and circuit architectures which are totally different from current microelectronics circuits, such as quantum computing, nanowire crossbar circuits, spin electronics, etc. Nanotechnology is bringing another technology revolution to traditional CMOS VLSI technology.

**At the end of the FDPs, delegates are able to**

- Reduced size for circuits.
- Increased cost-effectiveness for devices.
- Improved performance in terms of the operating speed of circuits.
- Requires less power than discrete components.
- Higher device reliability.
- Requires less space and promotes miniaturization.
- Memory chips density increases.
- Weight decreases.
- In the process of chips fabrication nanolithography is used.
- In integrated circuits, transistors size decreases or reduces.
- Electronic devices display screens improved.
- Power consumption reduced.

## About the Department MECHANICAL

The department of Mechanical Engineering was established in the year 2008. The department offers B.E (Mechanical Engineering) - Our mission is to create a research hub engaged in contemporary research in association with industries and other reputed institutions, impart best-of-class education to students with up-to-date curriculum and content in tune with industry requirements and foster a spirit of entrepreneurship among students to enable a few launch their own ventures

The department has highly qualified and experienced faculty members with some of them holding Ph.D and some are registered for the same.

## Vision of the Department

To be a center of academic excellence providing quality education in MECHANICAL Engineering

## Mission of the Department

- To create an active learning environment.
- To blend the faculty research under students project work.
- To promote inter disciplinary interaction and teamwork among the students.
- To update the students with recent trends in industry and research.

## About the Course

Researchers have developed a new kind of heating and cooling method that they have named the ionocaloric refrigeration cycle. They hope the technique will someday help phase out refrigerants that contribute to global warming and provide safe, efficient cooling and heating for homes.

## COURSE TOPICS

- ❖ Fundamental cycles – Carnot and Bell Coleman
- ❖ Air refrigeration systems
- ❖ Vapor Compression refrigeration
- ❖ Vapor Absorption refrigeration
- ❖ Steam jet refrigeration
- ❖ Components of refrigeration systems
- ❖ Air Conditioning systems
- ❖ Duct design
- ❖ Usage of Psychrometric, refrigeration tables and charts

## The Refrigeration Cycle

registration form in the prescribed format  
duly attested by the Head of the  
Institution/Department along with Demand  
Draft, to the address

mentioned below, on or before 29 July 2021.  
For provisional Registration, scanned copy  
of documents can be mailed to the email id  
mentioned below.

Maximum number of participants allowed is  
thirty. Registration will be confirmed only  
after receiving the Demand Draft. The  
registration fee includes course material,  
lunch, tea and snacks.

Faculty of Engineering College  
Rs. 1000/-

Participants will have to send a demand  
draft, for the registration fee, in favour of  
"KNRR Institute of Engineering", payable at  
Hyderabad, on or before 08 Mar, 2021  
Last date for Registration :29 July 2021

## About the Institution

Founded in 2008, Kasireddy Narayanreddy College of Engineering & Research is one of states most distinguished colleges. It has a student strength of more than 3,000 and a large and vibrant team of faculty.

Hope you will find your career preferences to twinset your academic interests, and social and leisure activities that will subsidize to your overall welfare, gratification and individual development. Our campus is a 70 acre stretch of land with hillocks on one side and plain area on the other three sides. The students are provided with plenty of opportunities to develop their individual talents and abilities and to aspire for excellence in academic and personality development. We believe in engender and promulgate knowledge and talent in core and frontier disciplines through innovative education programs, research, industrial training and consultancy and developing a new cadre of proficient citizens with a high level of competence, profound sense of social commitment and moral ethics.

## About the Department MECHANICAL

The department of Mechanical Engineering was established in the year 2008. The department offers B.E (Mechanical Engineering) - Our mission is to create a research hub engaged in contemporary research in association with industries and other reputed institutions, impart best-of-class education to students with up-to-date curriculum and content in tune with industry requirements and foster a spirit of entrepreneurship among students to enable a few launch their own ventures

The department has highly qualified and experienced faculty members with some of them holding Ph.D and some are registered for the same.

### Vision of the Department

To be a center of academic excellence providing quality education in MECHANICAL Engineering

### Mission of the Department

- To create an active learning environment.
- To blend the faculty research under students project work.
- To promote inter disciplinary interaction and teamwork among the students.
- To update the students with recent trends in industry and research.

### About the Course

The objective of this Faculty Development Program is to underline the significance of innovative pedagogies for effective teaching - learning process.

It shall provide a platform for Engineering faculties to become familiar with various innovative pedagogies and it's implementation.

Experts from renowned academic institutes are invited to share their experience about implementation of various innovative pedagogies in online/offline classrooms.

### Conceptual Context of the FDP:

The FDP is spread across 6 sessions each dealing with a vibrant topic. A handsome number of participants are expected to attend the event. The major themes of the

### FDP includes:

- Outcome based teaching and learning methods
- Using new technologies for teaching and multidisciplinary research
- Qualitative, Quantitative and Mixed methods approach
- Developing a strong research proposal writing to get funded project
- Preparing legal research papers for high impact factor journals

### Travel and Accommodation

Accommodation and TA/DA expenses are to be met by the Participants. No accommodation will be provided by the Institute. The participants have to arrange their accommodation at their own.

### Food

Lunch, snacks and tea will be served to the registered participants at free of cost.

## About the Course

Welding is a fabrication process whereby two or more parts are fused together by means of heat, pressure or both forming a joint as the parts cool. Welding is usually used on metals and thermoplastics but can also be used on wood. The completed welded joint may be referred to as a weldment.

The course will cover the following topics

- Overview of Welding Processes & Materials
- Welding Techniques and Emerging Trends
- Welding Metallurgy of Ferrous & NonFerrous Materials
- Welding Design and Residual stress & Distortion
- Advancements in Fusion and Solid State Welding of metals and non-metals
- Applications of Finite Element Method in welding
- Surfacing – Friction, GMAW, SMAW, Plasma
- Friction Stir Welding / Processing
- Friction Stir Additive Manufacturing
- Metal Matrix Composites using FSP

## About the Course

Alternative fuels include gaseous fuels such as hydrogen, natural gas, and propane; alcohols such as ethanol, methanol, and butanol; vegetable and waste-derived oils; and electricity

- Green fuels: Pragmatic intervention to slow down climate change
- CNG as alternate fuel for Indian Railways
- Production of biofuels and their application
- Biofuels prospectus and challenges

- Nano additives for Biofuels
- Hydrogen: Alternate Fuel for IC Engines
- Net Energy Analysis of ethanol

## About the Course

Design engineers research and develop designs for projects in a range of sectors, from construction to software, medical equipment and manufacturing. They also modify existing products or designs to increase efficiency or improve performance, and manage the process of turning their designs into reality.

## DESIGN ENGINEERING

- Fundamentals of Mechanical Engineering Design
- New set of learning material including PPTs, Videos, Case Studies, Examples etc..

- Hands on exercises designed exclusively for FDPs to understand Design Thinking approach
- Reverse Engineering & Prototyping techniques Test the prototype and ethics in design.
- Factors influencing machine design
- Identifying gap areas and supporting them by process / tools.
- Research: Ethnographic study for observation & documentation.
- Tools – Mind Mapping, Lotus Blossom.
- Finalization of project as a Case Study.

## Travel and Accommodation

## About the Course

Solar thermal energy can be used for such applications as, space heating, air conditioning, hot water, industrial process heat, drying, distillation and desalination, and electrical power

• Renewable Energy and Sustainability. This session focused on the relationship between the access to energy through renewable energy base systems with the sustainability

- Biomass and elaborate the various experimental results and the new research areas in this emerging field
- The various solar energy radiation measurement instruments and solar energy base systems were demonstrated to the participants.
- details the various system configurations, technical specifications of each component and various applications of off-grid PV systems
- The system design criteria of grid connected systems was also discussed in details

## About the Course

Technologies such as digital twins, machine learning, AI (artificial intelligence), AR and VR (augmented reality and virtual reality) are helping manufacturers navigate COVID challenges by enabling remote monitoring, servicing and equipment operation — all without the need to be on-site

Introduction to Recent Developments in

Manufacturing Technology

2. Recently Developed Manufacturing

Processes, Role and contribution of

Manufacturing for development

of Nation.

3. Development of New advanced

materials useful in Aerospace, Defence

and Automobiles field.

4. Recent advancements in 3-D printing technology and Development of new Coating technologies.

5. Introduction of advanced Material Characterization techniques.

6. Smart Materials and Role of Manufacturing in Industry 4.0

7. Discuss about IOT and Machine Learning, Composite Materials and Industrial Robotics.

8. Minimum Quality Lubrication Cryogenic Machining, Advanced coatings for cutting tools and Grinding of Hard Materials.

9. Functionally Graded Bioceramic Coatings for Biomedical Applications Electro Discharge Machining and Abrasive Flow Finishing Additive Manufacturing Technologies.

## Travel and Accommodation

Accommodation and TA/DA expenses are to be met by the Participants. No accommodation will be provided by the Institute. The participants have to arrange their accommodation at their own.

## Food

Lunch, snacks and tea will be served to the registered participants at free of cost.

## About the Institution

Founded in 2008, Kasireddy Narayanreddy College of Engineering & Research is one of states most distinguished colleges. It has a student strength of more than 3,000 and a large and vibrant team of faculty.

Hope you will find your career preferences to twinset your academic interests, and social and leisure activities that will subsidize to your overall welfare, gratification and individual development.

Our campus is a 70 acre stretch of land with hillocks on one side and plain area on the other three sides. The students are provided with plenty of opportunities to develop their individual talents and

abilities and to aspire for excellence in academic and personality development. We believe in engender and promulgate knowledge and talent in core and frontier disciplines through innovative education

programs, research, industrial training and consultancy and developing a new cadre of proficient citizens with a high level of competence, profound sense of social commitment and moral ethics.

## About the Department MECHANICAL

The department of Mechanical Engineering was established in the year 2008. The department offers B.E (Mechanical Engineering) - Our mission is to create a research hub engaged in contemporary research in association with industries and other reputed institutions, impart best-of-class education to students with up-to-date curriculum and content in tune with industry requirements and foster a spirit of entrepreneurship among students to enable a few launch their own ventures

The department has highly qualified and experienced faculty members with some of them holding Ph.D and some are registered for the same.

## Vision of the Department

To be a center of academic excellence providing quality education in MECHANICAL Engineering

## Mission of the Department

- To create an active learning environment.
- To blend the faculty research under students project work.
- To promote inter disciplinary interaction and teamwork among the students.
- To update the students with recent trends in industry and research.

## About the Course

Newer generation composites have been produced in order to protect the healthy tooth structure, to reduce microleakage and secondary caries formation, increase fracture toughness and to reduce marginal pigmentation and postoperative sensitivity together with developments in technology

1. The course is proposed to generate and impart knowledge on the advancement in composite materials.
2. To provide knowledge about the mechanical characterization of composite materials.
3. To provide the forum to keep themselves abreast of tribological peculiarities of composites.
4. Create a culture of learning and self-improvement.

On completion of this FDP, the participant will be able to:

1. Understand the latest and advanced inputs about composites manufacturing techniques.
2. Make a specific recommendation for a future course of action to promote efficient & effective trends and technologies in composite material manufacturing and their tribological aspects.
3. This FDP will enhance better teaching ability with respect to content and delivery in the area of composite materials.

## Travel and Accommodation

Accommodation and TA/DA expenses for the participants will be provided by the Institute. The participants have to arrange their accommodation at their own.

## Food

Lunch, snacks and tea will be served to the registered participants at free of cost.

## About the department of cse

Department of Computer Science and Engineering is part of our institute since its inception and has grown exponentially over the last few years, and is persistently developing to meet the recent trends in computing.

With the objective of imparting value education in the field of Computer Science & Engineering, the department has a prominent team with experienced, veteran and dedicated faculty, well equipped labs with the state-of-the-art computing system and peripherals.

With swiftly evolving technology and the incessant need for innovation, it has been the department's ongoing attempt to produce quality technologists for our country.

## Vision of the Department

To contribute to the society through excellence in scientific and knowledge-based education utilizing the potential of computer science and engineering with a deep passion for wisdom, culture and values.

## Mission of the Department

Provide quality undergraduate and graduate education in both the theoretical and applied foundations of computer science and train students to solve realworld problems.

Conduct research to advance the state of the art in computer science and integrate research results and innovations into other scientific disciplines

To provide quality education to meet the need of profession and society.  
Provide a learning ambience to enhance innovations, problem solving skills, leadership qualities, team-spirit and ethical responsibility  
Establish Industry Institute Interaction program to enhance the entrepreneurship skills  
Provide exposure of latest tools and technologies in the area of engineering and technology.

## Travel and Accommodation

Accommodation and TA/DA expenses are to be met by the Participants. No accommodation will be provided by the Institute. The participants have to arrange their accommodation at their own.

## Food

Lunch, snacks and tea will be served to the registered participants at free of cost.

## About the course:

AWS for beginners offers database storage options, computing power, content delivery, and networking among other functionalities to help organizations scale up. It allows you to select your desired solutions while you pay for exactly the services you consume only.

## About the institution

Founded in 2008, Kasireddy Narayanreddy College of Engineering & Research is one of states most distinguished colleges. It has a student strength of more than 3,000 and a large and vibrant team of faculty.

Hope you will find your career preferences to twinset your academic interests, and social and leisure activities that will subsidize to your overall welfare, gratification and individual development.

Our campus is a 70 acre stretch of land with hillocks on one side and plain area on the other three sides. The students are provided with plenty of opportunities to develop their individual talents and abilities and to aspire for excellence in academic and personality development. We believe in engender and promulgate knowledge and talent in core and frontier disciplines through innovative education programs, research, industrial training and consultancy and developing a new cadre of proficient citizens with a high level of competence, profound sense of social commitment and moral ethics.

## About the department of cse

Department of Computer Science and Engineering is part of our institute since its inception and has grown exponentially over the last few years, and is persistently developing to meet the recent trends in computing.

With the objective of imparting value education in the field of Computer Science & Engineering, the department has a prominent team with experienced, veteran and dedicated faculty, well equipped labs with the state-of-the-art computing system and peripherals.

With swiftly evolving technology and the incessant need for innovation, it has been the department's ongoing attempt to produce quality technologists for our country.

## Vision of the Department

To contribute to the society through excellence in scientific and knowledge-based education utilizing the potential of computer science and engineering with a deep passion for wisdom, culture and values.

### Mission of the Department

Provide quality undergraduate and graduate education in both the theoretical and applied foundations of computer science and train students to solve realworld problems.  
Conduct research to advance the state of the art in computer science and integrate research results and innovations into other scientific disciplines  
To provide quality education to meet the need of profession and society.  
Provide a learning ambience to enhance innovations, problem solving skills, leadership qualities, team-spirit and ethical responsibility  
Establish Industry Institute Interaction program to enhance the entrepreneurship skills  
Provide exposure of latest tools and technologies in the area of engineering and technology.

### Travel and Accommodation

Accommodation and TA/DA expenses are to be met by the Participants. No accommodation will be provided by the Institute. The participants have to arrange their accommodation at their own.

### Food

Lunch, snacks and tea will be served to the registered participants at free of cost.

## About the Department of CIVIL

The Electronics and Communication Engineering (ECE) Department was established in the year 2008 with an annual intake of 60. Currently the annual intake is 120, besides an additional 20% under lateral entry scheme.

The B.Tech (ECE) Program is approved by AICTE, Govt of Telangana and the college is permanently affiliated to JNTU-Hyderabad. The department is staffed by highly qualified and well experienced teaching faculty and technical staff.

The department has well-equipped laboratories coupled with extensive practical work ensure that the student receives a well-rounded education. The significant equipment in the laboratories supports for carrying out research include Spectrum Analyzer, Digital Storage Oscilloscopes, Spartan 3E (FPGA) kits, TMS 320C6748 DSP kits with Code Composer Studio. The labs are also equipped with Software's such as MULTISIM, VHDL, Xilinx ISE Foundation, Mentor Graphics, and MATLAB with tool boxes.

## Vision of the Department

To be a center of academic excellence providing quality education in CIVIL Engineering

## Mission of the Department

- To create an active learning environment.
- To blend the faculty research under students project work.
- To promote inter disciplinary interaction and teamwork among the students.
- To update the students with recent trends in industry and research.

## About the Course

Pavement engineering is a branch of civil engineering that uses engineering techniques to design and maintain flexible (asphalt) and rigid (concrete) pavements. This includes streets and highways and involves knowledge of soils, hydraulics, and material properties.

## About the Department of CIVIL

The Department of civil engineering has been functioning since 2008 with emphasis on fundamental theory and practice in Civil Engineering, keeping in view the current and continuously changing scenarios in this discipline. The department offers a full time B.Tech degree course in civil engineering. Apart from conducting academic programs, additional computer courses, seminars and workshops are conducted for the students as well as the faculty. A number of consultancy works are also being carried out. The department was under the affiliated to JNT University Hyderabad.

The present student intake of the department is 120. The department has well experienced faculty. In addition to teaching and instruction, the faculty is also engaged in active research with an aim to generate innovative concepts and ideas or apply the existing technologies to new applications. The department has a number of ongoing/completed/applied research projects and industrial consultancy work from various agencies.

## Vision of the Department

To be a center of academic excellence providing quality education in CIVIL Engineering

## Mission of the Department

- To create an active learning environment.
- To blend the faculty research under students project work.
- To promote inter disciplinary interaction and teamwork among the students.
- To update the students with recent trends in industry and research.

## About the Course

Advances and innovations in materials science and engineering have always played a substantial role in civil engineering, building structural design, and construction. In recent years, extensive effort has been devoted to the applications of stimulative responsive smart materials and nanostructures in buildings. These smart materials used in the built environment can be defined as those offering specific functional and adaptable properties in response to thermal, optical, structural, and environmental stimuli. Not only do these materials enhance the overall performance of new building construction but also promise safer structures, longer durability of building elements, efficient building energy savings, greater environmental sustainability, and even higher indoor user comfort

Given the increasing imperatives for the above, we have organized this themed special issue that focuses on smart buildings and construction materials. The main aim of this special issue is to encapsulate the current interest and state of research related to the smart materials in building and construction applications, underpinning current and future challenges in building energy, environmental sustainability, and structural safety and durability

## Travel and Accommodation

Accommodation and TA/DA expenses are to be met by the Participants. No accommodation will be provided by the Institute. The participants have to arrange their accommodation at their own.

## Food

Lunch, snacks and tea will be served to the registered participants at free of cost.

## Registration Form

Name: \_\_\_\_\_

Designation: \_\_\_\_\_

Organization: \_\_\_\_\_

Address: \_\_\_\_\_

Contact no: \_\_\_\_\_

Sex:  Male  Female

Experience (in years): \_\_\_\_\_

Teaching: \_\_\_\_\_ Research: \_\_\_\_\_

Others (Please Specify): \_\_\_\_\_

Mobile No: \_\_\_\_\_

E-mail: \_\_\_\_\_

Signature of the Participant \_\_\_\_\_

Signature of the Head of the Institute/ Department.  
(With seal) Photocopies of the registration form can also be used, if necessary, or the form can also be downloaded from the college website. Separate forms must be submitted in case of multiple faculty members intend to attend the program.

### FACULTY DEVELOPMENT PROGRAMS ON Recent Advance In Concrete & Construction

From

**26 -12- 2018 To 31-12-2018**

Organized by

Department of CIVIL ENGINEERING

KASIREDDY NARAYANREDDY COLLEGE OF ENGINEERING AND RESEARCH

Approved by AICTE, New Delhi, Affiliated to JNTU-H  
Abdullapur (V), Abdullapur (M), R.R. Dist., Hyderabad, Telangana - 501 505

Course Coordinator

**Mr.M.PAVAN YADAV**

### Target Audience

Faculty members of Engineering College  
Instructors of CIVIL, DEPARTMENTS and  
Professionals from Industries with minimum  
qualification of B.Tech. and interested in  
should send their filled in registration form in  
the prescribed format duly attested by the  
Head of the institution/Department along  
with Demand Draft, to the address mentioned  
below, on or before 24 Dec 2018. For  
provisional Registration, scanned copy of  
documents can be mailed to the email id  
mentioned below.

Maximum number of participants allowed is  
thirty. Registration will be confirmed only  
after receiving the Demand Draft. The  
registration fee includes course material,  
lunch, tea and snacks. Faculty of Engineering  
College Rs. 1000/- Participants will have to  
send a demand draft, for the registration fee,  
in favour of "KNRR Institute of Engineering",  
payable at Hyderabad, on or before 24 Dec  
2018 Last date for Registration :24 Dec 2018  
Intimation of Selection 24 Dec 2018

## About the Institution

Founded in 2008, Kasireddy Narayanreddy College of Engineering & Research is one of states most distinguished colleges. It has a student strength of more than 3,000 and a large and vibrant team of faculty.

Hope you will find your career preferences to twinset your academic interests, and social and leisure activities that will subsidize to your overall welfare, gratification and individual development. Our campus is a 70 acre stretch of land with hillocks on one side and plain area on the other three sides. The students are provided with plenty of opportunities to develop their individual talents and abilities and to aspire for excellence in academic and personality development. We believe in engender and promulgate knowledge and talent in core and frontier disciplines through innovative education programs, research, industrial training and consultancy and developing a new cadre of proficient citizens with a high level of competence, profound sense of social commitment and moral ethics.

## About the Department of CIVIL

The Electronics and Communication Engineering (ECE) Department was established in the year 2008 with an annual intake of 60. Currently the annual intake is 120, besides an additional 20% under lateral entry scheme.

The B.Tech (ECE) Program is approved by AICTE, Govt of Telangana and the college is permanently affiliated to JNTU-Hyderabad. The department is staffed by highly qualified and well experienced teaching faculty and technical staff.

The department has well-equipped laboratories coupled with extensive practical work ensure that the student receives a well-rounded education. The significant equipment in the laboratories supports for carrying out research include Spectrum Analyzer, Digital Storage Oscilloscopes, Spartan 3E (FPGA) kits, TMS 320C6748 DSP Kits with Code Composer Studio. The labs are also equipped with Software's such as MULTISIM, VHDL, Xilinx ISE Foundation, Mentor Graphics, and MATLAB with tool boxes.

## Vision of the Department

To be a center of academic excellence providing quality education in CIVIL Engineering

## Mission of the Department

- To create an active learning environment.
- To blend the faculty research under students project work.
- To promote inter disciplinary interaction and teamwork among the students.
- To update the students with recent trends in industry and research.

## About the Course

The development of chemical admixtures has revolutionized concrete technology in the last fifty years. The use of air entraining admixtures, accelerators, retarders, water reducers and corrosion inhibitors are commonly used for bridges.

The Department of civil engineering has been functioning since 2008 with emphasis on fundamental theory and practice in Civil Engineering, keeping in view the current and continuously changing scenarios in this discipline. The department offers a full time B.Tech degree course in civil engineering. Apart from conducting academic programs, additional computer courses, seminars and workshops are conducted for the students as well as the faculty. A number of consultancy works are also being carried out. The department was under the affiliation to JNT University Hyderabad.

2. Class Room Management  
 3. Effective use of Modern Teaching aids  
 4. Teaching • Learning Techniques  
 5. Concentration Techniques  
 6. Understanding Student Psychology/earner Characteristics  
 7. Student Motivation Techniques  
 B. Leadership and Managerial skills  
 9. Art of Public speaking  
 10. Transactional analysis

The present student intake of the department is 120. The department has well experienced faculty. In addition to teaching and instruction, the faculty is also engaged in active research with an aim to generate innovative concepts and ideas or apply the existing technologies to new applications. The department has a number of ongoing/completed/applied research projects and industrial consultancy work from various agencies.

To be a center of academic excellence providing quality education in CIVIL Engineering

Faculty members of Engineering College  
 Instructors of CIVIL DEPARTMENTS and  
 Professionals from Industries with minimum  
 qualification of B.Tech. and interested in  
 should send their filled in registration form in  
 the prescribed format duly attested by the  
 Head of the institution/Department along  
 with Demand Draft, to the address mentioned  
 below, on or before 08 Jan 2022. For  
 provisional Registration, scanned copy of  
 documents can be mailed to the email id  
 mentioned below.

Maximum number of participants allowed is  
 thirty. Registration will be confirmed only  
 after receiving the Demand Draft. The  
 registration fee includes course material,  
 lunch, tea and snacks. Faculty of Engineering  
 College Rs. 1000/- Participants will have to  
 send a demand draft, for the registration fee,  
 in favour of "KNRR Institute of Engineering",  
 payable at Hyderabad, on or before 08 Jan  
 2022 Last date for Registration :08 Jan 2022  
 Intimation of Selection 08 Jan 2022

## About the Institution

Founded in 2008, Kasireddy Narayanreddy College of Engineering & Research is one of states most distinguished colleges. It has a student strength of more than 3,000 and a large and vibrant team of faculty.

Hope you will find your career preferences to twinset your academic interests, and social and leisure activities that will subsidize to your overall welfare, gratification and individual development. Our campus is a 70 acre stretch of land with hillocks on one side and plain area on the other three sides. The students are provided with plenty of opportunities to develop their individual talents and abilities and to aspire for excellence in academic and personality development. We believe in engender and promulgate knowledge and talent in core and frontier disciplines through innovative education programs, research, industrial training and consultancy and developing a new cadre of proficient citizens with a high level of competence, profound sense of social commitment and moral ethics.

## About the Department of CIVIL

The Electronics and Communication Engineering (ECE) Department was established in the year 2008 with an annual intake of 60. Currently the annual intake is 120, besides an additional 20% under lateral entry scheme.

The B.Tech (ECE) Program is approved by AICTE, Govt of Telangana and the college is permanently affiliated to JNTU- Hyderabad. The department is staffed by highly qualified and well experienced teaching faculty and technical staff.

The department has well-equipped laboratories coupled with extensive practical work ensure that the student receives a well-rounded education. The significant equipment in the laboratories supports for carrying out research include Spectrum Analyzer, Digital Storage Oscilloscopes, Spartan 3E (FPGA) kits, TMS 320C6748 DSP kits with Code Composer Studio. The labs are also equipped with Software's such as MULTISIM, VHDL, Xilinx ISE Foundation, Mentor Graphics, and MATLAB with tool boxes.

## Vsion of the Department

To be a center of academic excellence providing quality education in CIVIL Engineering

## Mission of the Department

- To create an active learning environment.
- To blend the faculty research under students project work.
- To promote inter disciplinary interaction and teamwork among the students.
- To update the students with recent trends in industry and research.

## About the Course

A changing climate can severely perturb regional hydrology and thereby affect human societies and life in general. To assess and simulate such potential hydrological climate change impacts, hydrological models require reliable meteorological variables for current and future climate conditions.

## Travel and Accommodation

Accommodation and TA/DA expenses are to be met by the Participants. No accommodation will be provided by the Institute. The participants have to arrange their accommodation at their own.

## Food

Lunch, snacks and tea will be served to the registered participants at free of cost.

## About the Course

engineering have always played a substantial role in civil engineering, building structural design, and construction. In recent years, extensive effort has been devoted to the applications of stimulative responsive smart materials and nanostructures in buildings. These smart materials used in the built environment can be defined as those offering specific functional and adaptable properties in response to thermal, optical, structural, and environmental stimuli. Not only do these materials enhance the overall performance of new building construction but also promise safer structures, longer durability of building elements, efficient building energy savings, greater environmental sustainability, and even higher indoor user comfort

The students are provided with plenty of opportunities to develop their individual talents and abilities and to aspire for excellence in academic and personality development. We believe in engender and promulgate knowledge and talent in core and frontier disciplines through innovative education programs, research, industrial training and consultancy and developing a new cadre of proficient citizens with a high level of competence, profound sense of social commitment and moral ethics.

## Vision of the Department

To be recognized as a center of excellence to produce competent and ethical electrical engineers capable of finding solutions to problems related to society, environment and industry using trending and innovative technologies.

### Mission of the Department

- M1: To make the preferred destination for admissions, to become autonomous by imparting quality technical education using state of the art teaching learning practices with accordance to the curricula and syllabi to meet the industrial and societal needs.
- M2: To promote excellence in teaching research incubation, consultancy activities and positive contribution for the upliftment of the society
- M3: To enable students to develop skills to solve complex technological problems of current times and also provide a frame work for promoting collaborative and multi disciplinary activities.
- M4: To nurture the faculty and expose them to world class infrastructure.

### about the course:

The power demand in real time world is rapidly increasing day by day. Starting from the daily needs of a human being to the industrial needs the electric power play a very crucial role. Supplying huge and continuous power is the biggest challenging task for the existing power system. In an attempt of supplying a continuous power for the consumers, the distributed generation (dispersed generation, decentralized generation and embedded generation) are introduced and it is integrated to the power grid. Distribution generation is the process of generating electricity at the customer end by the customer that may be interconnected to the distribution grids. Power generated by these distributed generation will be fed to the main grid through proper

infrastructure.

### about the course

Solar and energy storage technologies will play a significant role in achieving Puerto Rico's resilience and renewable energy goals. Activities in this technical domain will assess Puerto Rico's technical solar potential, work to identify the most cost-effective areas for deployment, and analyze future potential while forecasting deployment impacts.

### Travel and Accommodation

## about the institution

Founded in 2008, Kasireddy Narayanreddy College of Engineering & Research is one of states most distinguished colleges. It has a student strength of more then 3,000 and a large and vibrant team of faculty.

Hope you will find your career preferences to twinset your academic interests, and social and leisure activities that will subsidize to your overall welfare, gratification and individual development. Our campus is a 70 acre stretch of land with hillocks on one side and plain area on the other three sides. The students are provided with plenty of opportunities to develop their individual talents and abilities and to aspire for excellence in academic and personality development. We believe in engender and promulgate knowledge and talent in core and frontier disciplines through innovative education programs, research, industrial training and consultancy and developing a new cadre of proficient citizens with a high level of competence,

profound sense of social commitment and moral ethics.

## Vision of the Department

To be recognized as a center of excellence to produce competent and ethical electrical engineers capable of finding solutions to problems related to society, environment and industry using trending and innovative technologies.

### Mission of the Department

- M1: To make the preferred destination for admissions, to become autonomous by imparting quality technical education using state of the art teaching learning practices with accordance to the curricula and syllabi to meet the industrial and societal needs.
- M2: To promote excellence in teaching research incubation, consultancy activities and positive contribution for the upliftment of the society
- M3: To enable students to develop skills to solve complex technological problems of current times and also provide a frame work for promoting collaborative and multi disciplinary activities.
- M4: To nurture the faculty and expose them to world class infrastructure.

### about the course

Solar and energy storage technologies will play a significant role in achieving Puerto Rico's resilience and renewable energy goals. Activities in this technical domain will assess Puerto Rico's technical solar potential, work to identify the most cost-effective areas for deployment, and analyze future potential while forecasting deployment impacts.

### Travel and Accommodation

Accommodation and TA/DA expenses are to be met by the Participants. No accommodation will be provided by the Institute. The participants have to arrange their accommodation at their own.

### Food

Lunch, snacks and tea will be served to the registered participants at free of cost.
