---

The first step toward college campus sustainability is to make recycling as easy as possible. Every trash bin on campus is paired with a recycling bin for students to toss, paper, glass cans and cardboard without having to sort it beforehand. Using this system, the college hopes to achieve a 50% waste diversion rate.

College campus our setting up an e-waste collection event is a great idea for promoting campus sustainability.

- Get permission from your facilities department to set up collection bins in an on-campus parking lot.
- Contact local recycling businesses and vendors to see what kinds of electronics they accept and make sure they are willing to accept bulk drop-offs.
- Check to see if there are any additional fees for recycling certain items.
- Use social media to spread the word about your event and include a list of accepted electronics.
- Promote exercise and healthy living.
- Reduce vehicle emissions around campus.
- Fund additional campus sustainability initiatives with bike rental fees.
- Encourage those who wouldn't normally ride a bike to start using greener transportation.
